

"I wanted to be competitive in the field of professional Web site design. Pursuing CIW certification gave me industry-recognized knowledge, skills and credibility to do that."

- David Eash
Internet Business Owner, Sturgis, Michigan, USA

CIW JavaScript Specialist

The CIW JavaScript Specialist course teaches developers how to use the features of the JavaScript language to design client-side, platform-independent solutions. Students will also understand and use the most popular applications of JavaScript. These specialized Web language skills can help you begin or grow a career in advanced Web development and technologies.

Topics include:

- JavaScript language essentials, including program flow control, form validation, image animation, frame targeting and cookie creation.
- JavaScript code development, including writing programs and writing script for the JavaScript object model.
- Web site implementation, including authoring and scripting, Web content creation, Web management and digital media tools.

Typical Time to Teach

The JavaScript Specialist course can be taught in a number of environments and therefore the time to teach it can vary. Some typical time frames:

Secondary	one semester
Higher Education	eight to twelve weeks
Training Providers	one week

Associated Jobs and Careers

CIW JavaScript Specialist provides advanced training and certification for individuals planning to pursue Web development specialization, leading to job roles and career paths such as:

- Web Developer
- Software Developer
- Application Programmer
- Client/Server Developer
- E-Commerce Site Developer

CIW Perl Specialist exam (1D0-437)
50 questions | 75 minutes
CIW Database Design Specialist exam (1D0-541)
50 questions | 75 minutes

CIW Program Overview

CIW (Certified Internet Web Professional) is the world's fastest growing vendor-neutral Internet skills training and certification program for professionals. More than a certification or a curriculum publisher, CIW is a Web technology standard adopted by academic institutions, governments and businesses worldwide. CIW includes applications and competencies, but our core curriculum focuses on the foundational standards that sustain the infrastructure of IT: Web design, e-commerce, security, networking and databases.
